

ASHUTOSH MALLIK

Bhubaneswar, Odisha, India ✉ ashutoshmallik546@gmail.com github.com/ashutoshmallik610

SUMMARY

MCA graduate with strong knowledge of Core Java, , Java 8 features (Functional Interfaces, Lambda Expressions, Default & Static Methods), OOP, Collections Framework, and SQL. Developed Java console applications through academic projects and internships. Seeking a Java Developer role to build scalable software solutions.

EDUCATION	
Gandhi Institute for Technological Advancement (GITA)	Bhubaneswar Odisha
Brundaban + Science Residential College Baramba	Cuttack Odisha
1. 100%	
Kanpur Anchalika H S School Kanpur	Cuttack Odisha

CERTIFICATIONS	
Java Programming Certification	Aug 2024
- Successfully completed at Quality Matters	
HTML and CSS: Building a Simple Website Coursera	
Introduction to Generative AI Coursera	

TECHNICAL SKILLS	
Languages: Java, C#.NET Core, C++, JavaScript, HTML/CSS	
Concepts: OOP, Exception Handling, Collections Framework, Functional Interfaces, Lambda Expressions, Default & Static Methods (Java 8), Multithreading	
Tools: Eclipse, VS Code, IntelliJ IDEA, GitHub	
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Technical Communication	

INTERNSHIPS	
ASADL Media Pvt. Ltd.	
Software Engineer Trainee	Oct 2023 - Present
- Assisted in software development and testing activities. Collaborated with team members to understand development workflows. Participated in debugging, issue tracking, and application maintenance. - Worked with development tools and followed the Software Development Life Cycle (SDLC). - Gained practical exposure to software engineering practices in a professional environment.	

Unify Technologies	Online
Java Specialist Intern	2024
- Developed and optimized Java-based applications leveraging core OOP principles including inheritance, polymorphism, encapsulation, and abstraction to build modular, maintainable codebases. - Developed small java programs for practical understanding.	

PROJECTS	
Online Food Delivery System	
- Developed a console-based food delivery application using Core Java, OOP, Interfaces, and Arrays. - Implemented customer management, ordering, payment, ratings, and discount calculation using Encapsulation, Inheritance, Runtime Polymorphism, and Method Overriding.	
Company Resource Management System	
- Developed a console-based Company Resource Management System using Core Java, OOP, Abstract Classes, Interfaces, and Arrays. - Implemented employee management, login authentication, report generation, and role-based modules for Developer, Tester, and Senior Developer using inheritance and runtime polymorphism. - Applied Encapsulation, Method Overriding, Constructor Chaining, Static & Instance Blocks, and StringBuilder to build a modular and maintainable application.
